Abstract (en)

[origin: EP2525439A1] A mobile wireless communications device may include a portable housing (31), at least one wireless transceiver (33) carried by the portable housing, and at least one satellite positioning signal receiver (34) carried by the portable housing. The mobile wireless communications device may also include an antenna assembly (35) carried by the portable housing. The antenna assembly may include a base electrical conductor (36) having a pair of antenna feed points (37a,b) defined therein and coupled to the at least one wireless transceiver and the at least one satellite signal positioning receiver. The antenna assembly may also include first and second conductor arms (43,44) being spaced apart, parallel, and extending outwardly from the base electrical conductor.
