Abstract (en)
[origin: EP2525442A2] There is provided an electrical connector including a plurality of contact pins, which electrical connector can realize reduced reduction costs. A jack (10), as this electrical connector, includes a plurality of contact pins (110) arranged at a predetermined spacing from each other within a shield case (160). At least one of the plurality of contact pins (110) includes a projecting part (120) projecting toward another adjacent contact pin (110). The projecting part (120) makes the spacing between the plurality of contact pins (110) smaller than the predetermined spacing so as to change capacitance.
