Abstract (en)  
[origin: WO2011088854A1] The disclosure relates to a packaging laminate (30) for a cushion- shaped packaging container for liquid foods, e.g. milk. The packaging laminate (30) has a core layer (31) and outer, liquid-tight layers (32 and 33), as well as a layer (34) serving as gas barrier between the core layer (31) and one of the two outer liquid- tight layers (33). With a view to imparting to the cushion-shaped packaging container increased mechanical strength so that the packages may reliably be transported and handled without, or with substantially reduced risk of the occurrence of cracks and similar untightness in the flexible packaging walls, the packaging laminate (30) has a load-absorbing film (36) in contact with the gas barrier layer (34).
