Abstract (en)

[origin: WO2011090421A1] This invention relates to a shaft for a propeller assembly for a marine vessel, said shaft (1) arranged to provide torque to a propeller having a plurality of flanged blades via a hub (2), said hub (2) having mounting seats (3) circumferentially and equiangularly spaced from one another to provide mounting of the blades, wherein the shaft (1) has an extended end with an enlarged portion (21) forming the hub (2), wherein the diameter of said extended portion (21) is substantially larger than the diameter of the shaft (1).
