Abstract (en)  
[origin: WO2011085507A1] The invention relates to a facade insulation (11) with at least one carrier rail (23) which is arranged on an outer wall (19) of a building and with a plurality of thermal insulation panels (13) which are carried by the carrier rail (23). The carrier rail (23) is spaced apart from the outer wall (19) by at least two spacers (29). To transfer the weight of the thermal insulation panels (13) to the outer wall (19), at least two tension brackets (35) are provided which can each be fixed by a first end to the carrier rail (23) and by a second end to the outer wall (19). The invention also relates to an assembly kit for retaining thermal insulation panels (13) on an outer wall (19) of a building. The assembly kit comprises at least one carrier rail (23), at least two spacers (29), at least two tension brackets (35) and at least one wall fastening element (33).
