Abstract (en)  
[origin: WO2011086192A1] The invention relates to a device for holding luminous LED elements, comprising a support element (10) that can be connected to the power supply and has contact surfaces (12), and a clamping element (16) that can be connected to the support element (10) for receiving an LED chip (18) and that has contact elements (24) for electrically connecting the contact surfaces (12) of the support element (10) to connecting points (22) of the LED chip (18).
