Abstract (en)

[origin: WO2011089189A2] The invention relates to a guide disc assembly (40) for a heat exchanger (10), to a heat exchanger (10) using a guide disc assembly (40), to a production method for a heat exchanger (10), and to a retrofitting kit for retrofitting a heat exchanger (10). The guide disc assembly (40) according to the invention comprises a plurality of guide discs (50) which are designed to guide a medium (M1, M2) flowing in the heat exchanger (10), in the heat exchanger core (20) and in the jacket region (30') between the heat exchanger core (20) and a jacket (30) surrounding the heat exchanger core (20) in the cross-counterflow method. A respective disc (50) is designed to be clipped on the heat exchanger core (20).
