Abstract (en)

[origin: WO2011086275A1] The invention relates in particular to a method for securing an object, which includes steps consisting of: creating a multilayer graphic signature (23), by means of stacking with partial or complete transparency a first random graphic element (20) on a first layer (11) and a second graphic element (21) on a second layer (12); and storing said graphic signature on or in the object (10). The method according to the invention is essentially characterised in that: the relative position of the first graphic element (20) and the second graphic element (21) is random.
