Abstract (en)  
A method is described for application of hair extensions, comprising: a step of predisposing at least a predetermined number of hairs (2) belonging to a person to whom extensions are to be applied; a step of predisposing at least a lock (3) of hair comprising a plurality of hairs which exhibit a free end (4) at an end portion (5) of the lock (3); a step of predisposing at least a predetermined quantity of glue (6) suitable for connecting the lock (3) with the predetermined number of hairs (2). The method for application of hair extensions further comprises following steps: positioning the end portion (5) of the lock (3) at an attaching portion (7) of the predetermined number of hairs (2) such as to form a reciprocal interposing zone of the hairs of the person and the lock to be applied, applying the predetermined quantity of glue (6) on the interposing zone (8) such as to enable connection between the predetermined number of hairs (2) and the lock (3).
