Abstract (en)
The plastic ski coating comprises a filling material mixture for improving the sliding properties, where the filling mixture contains graphene, particularly graphene oxide and carbon black. The plastic is a press sintered plastic powder or plastic granulate. The proportion of graphene is between 0.1 and 10 weight percentage and with a thickness below 1 millimeter. The surface of graphene is silanized.

Abstract (de)
Die vorliegende Erfindung bezieht sich auf einen Kunststoff-Skibelag mit einer Füllstoffmischung zur Verbesserung der Gleiteigenschaften, dadurch gekennzeichnet, dass die Füllstoffmischung Graphen und/oder Graphenoxid und Ruß enthält.
