Abstract (en)
An edgebanding machine for fixing an edge element to an edge of an element (3) made of wood or similar materials, comprises a gluing swivelling unit (4) for applying an adhesive substance to the edge element or to the edge itself, and a support (7) for rotatably supporting the gluing unit (4) around a swivel axis (B). In order to reduce the machine downtimes necessary to replace the adhesive substance and/or to carry out maintenance operations on the gluing unit (4), a connecting device (9) is provided for removably connecting the gluing unit (4) to the support (7).
