Abstract (en)
[origin: EP2527536A1] The cabinet has a rejection beam (1) movably supported at a bracket between opening and closing positions. The beam is formed as a pipe section, and a lamp (3) e.g. red, green blue (RGB)-or white power LED, is arranged in a lens (4) at an end (2) of the section. A rectilinear light scattering part is arranged parallel to a longitudinal axis (5) of the section in a direction of another end (11) of the section. A device (9) for reflecting light radiated by the lamp is arranged at the latter end of the section. A part of the section is extended between the lamp and the reflecting device.
