Abstract (en)
The invention would be referred at construction field, in particular to systems of decoration of corners, surface joints sometimes uneven and may be used for floor-to-wall junctions sealing. Skirting -board profile is implemented from agglomerated cork - 1, consisted of high-temperature pressed crumbs of oak-tree cork. Outer decorative skirting -board part - 2 is made as a sheet of natural fine-wood veneer. Veneer sheet 2 is installed at front surface of skirting -board mounting part till surface part implemented as rounded edge 5. Implemented skirting -board design is flexible, waterproof, elastic due to used constructive materials and is easily mounted at any uneven or complicated wall and floor surfaces.
