Abstract (en)

[origin: EP2527575A2] The sliding door fitting comprises two slide wings (21,21'), where the former slide wing is displaceable from a flush position, in which the front side of the former slide wing extends flush mounted to the front side of the latter slide wing into an open position in the displacement direction over the slide wings above a displacement position. A control lever (5) is provided for controlling the former sliding door in the displacement position or in the flush position from a displacement of the former slide wing.
