Abstract (en)  
The channel has multiple U-shaped segments (2) arranged in a series arrangement, so that adjacent segments are movably interconnected relative to each other through a detent connection. The U-shaped segments are designed as cast parts, and consist of plastic i.e. plastic injection molded parts, and aluminum i.e. aluminum die-cast parts. Each segment comprises two U-legs (6, 8) interconnected by a connection leg (10). The detent connection comprises a locking element (12) arranged at the connection leg. An aluminum element (30) is connected with each segment over a snap connection.

Abstract (de)  
Ein Leuchtmittel-Aufnahmekanal zur Aufnahme von Leuchtmitteln einer Leuchte weist mehrere, längs einer Reihe angeordnete, U-förmige Segmente (2) auf, wobei jeweils zwei benachbarte Segmente (2) relativ zueinander beweglich miteinander verbunden und Gussteile sind.
