Abstract (en)

The device has a textile sheet structure (12) i.e. alarm textile, comprising a backing fabric (16) and electrical alarm conductors (18, 18') integrated into the fabric. A damage detector (14) monitors damage of the structure. The conductors are woven into the fabric as a warp thread and/or weft thread under formation of a laminar alarm cell (30). The alarm conductors are electrically connected with the detector over a current path and supply lines (22, 22') that are arranged parallel to each other. The detector is coupled with a control device over bus lines that are woven into the fabric. Independent claims are also included for the following: (1) a method for manufacturing an alarm device (2) a method for operating an alarm device.

Abstract (de)

Um bei einer Alarmvorrichtung mit einem Trägergewebe (16) und darin integrierten elektrischen Alarmleitern (18,18') die Überwachungsmöglichkeiten zu verbessern, wird vorgeschlagen, dass die Alarmleiter (18,18') als Kettfäden und/oder Schussfäden unter Bildung mindestens einer flächigen Alarmzelle (30) in das Trägergewebe (16) eingewebt sind, und dass die Alarmleiter (18,18') über jeweils einen eigenen Strompfad gesondert voneinander mit einem Beschädigungsdetektor (14) verbunden sind.
