Abstract (en)
[origin: WO2011092101A1] A writing instrument (10) comprises a grip piece (12) in which a writing cartridge (25) is accommodated in a longitudinally displaceable manner, which writing cartridge, in one of its two end positions, projects with its tip (28) from the lower end (16) of the grip piece (12), a mechanism (30), comprising a first control curve (39) and a second control curve (41), for latching the writing cartridge (25) in the two end positions, a push button (24), via which the mechanism (30) is actuated, and a resilient clip (34), which is disposed in the region of the push button (24). On the grip piece (12) there is captively fixed a preferably one-piece actuating part (19), which is displaceable relative to the grip piece (12) in the longitudinal direction (21) thereof and on which the push button (24), the clip (34) and one of the two control curves (39, 41) are configured (Fig. 1).
