Abstract (en)

[origin: WO2011092052A1] The invention relates to an optical device (1) for a motor vehicle, including a surface light source (2) emitting light rays (7) in a first direction (5), characterized in that it comprises an optical system (4) including first optical diverting means at least locally remote from the surface light source and diverting the light rays emitted in the first direction (5) towards a second direction (6) different from the first direction.
