Abstract (en)

[origin: WO2011091873A1] The invention relates to a method and system for fastening a round conductor (200) to a connection element (100, 100', 100''), comprising a connection element (100, 100', 100''), which has an at least partially shell-shaped form (110) at one end, a round conductor (200) terminated by a contact element (210), wherein the contact element (210) is designed for contacting with the connection element (100, 100', 100''), and a fastening device (400, 510, 520, 610, 620, 660, 710, 810), which is designed to fasten an end area (220) of the round conductor (200) lying in front of the contact element (210) to the connection element (100, 100', 100'') in the area of the shell-shaped form (110) of the connection element (100, 100', 100'') in a force-locked manner.
