Abstract (en)  
[origin: EP2529655A1] A dishwasher comprises a washing tub constructed of a bottom structural member and a washing tub member and disposed in a drawable manner in a forward direction, and a sealing part water-sealing a joint portion formed of an upper edge of the bottom structural member and a lower edge of the washing tub member. The washing tub member is provided with a shielding rib at the interior side of the sealing part and a collecting space formed between the sealing part and the shielding rib. The structure prevents washing water from getting into the sealing part, and capable of maintaining hermeticity in the joint portion of the washing tub during drawing-out operation and even after an extended period of use.
