Abstract (en)

[origin: EP2529799A2] The present invention relates to a basketball post for a basketball game, and more particularly, to a mobile basketball post for a basketball game, which is movable using power. The mobile basketball post for a basketball game according to the present invention comprises: a base; a pillar mounted on the base; a backboard mounted on a top of the pillar; and a rim arranged at a lower portion of the backboard, wherein the base has an accommodation space formed therein, and a frame consisting of a plurality of bars is installed in the accommodation space, and a pair of driven wheels are installed at one side of the frame. The mobile basketball post of the present invention further comprises: moving means including a motor which is fixed at an intermediate portion of the frame so as to be placed in the accommodation space, and which has a first pulley mounted on a rotating shaft thereof; a shaft which is installed in the accommodation space such that the shaft is rotatable by a bearing unit fixed at the other side of the frame, and which has a second pulley; driving wheels fixed at either end of the shaft; and a belt installed on both the first pulley and the second pulley.
