Abstract (en)  
A razor (1) comprises a handle (2) including a drive means, a razor blade unit (7) which is movable with respect to the handle (2) and which is provided with at least a razor blade (8) including a cutting edge (9), and a transmission through which the drive means drives the razor blade unit (7). The transmission is adapted such that said cutting edge (9) is moved reciprocatingly in transverse direction of itself under operating conditions.
