Abstract (en)

[origin: EP2529901A1] The device has an advancing device (15,16) for the stepwise advancement of a cardboard (2) around a desired cutting measurement (B). A cross-cutting device is provided for separating a respective section (3). The cross-cutting device has a circular knife (20) and a fixed counter blade (21). A retaining element (31) is provided for the separated section. The retaining element is moved synchronously to the circular knife and provided below an upper side of the cardboard.
