Abstract (en)
A belt clamp (1) is disclosed in which, for example, a pair of anti-slipping portions (17) are arranged on a front surface (a surface provided with a toothed portion) at both ends in width direction of a belt body (11) of a belt (3) of the belt clamp (1). The pair of anti-slipping portions (17) are disposed at a portion of a distal end (11a) of the belt body (11) not having a toothed portion and so as not to overlap with the toothed portion in the width direction.
