Abstract (en)

Formwork panel (1) comprising two parallel flat faces (3) suitable for defining a formwork face that is in contact with the concrete. It also comprises a gap inner space (4) defined between the two flat faces (3) and stiffening means (2) necessary for the formwork panel (1) to withstand the operating pressure during the concrete setting process. The formwork panel (1) also comprises two faced semi-panels (5) coupled to each other and defining the gap inner space (4). Each semi-panel (5) comprises one of said flat faces (3) and the stiffening means (2) are built into at least one of said semi-panels (5).
