Abstract (en)  
The structure i.e. prefabricated garage (10), has a wall arrangement (12) made of concrete and designed with a textile reinforcement e.g., fabric, made of a textile material. The wall arrangement includes walls (18) i.e. planar plates, for enclosing an inner chamber (11). The walls stay relative to each other in an angle and seamlessly connected below each other. The walls are provided with a rib structure. The rib structure includes ribs, which protrude into the inner chamber. The textile reinforcement includes bars made of fiber-plastic-composite material.

Abstract (de)  
Der erfindungsgemäße Baukörper wird durch eine aus Textilbeton bestehende Wandanordnung (12) gebildet, die einen Innenraum (11) umschließt. Die Verwendung von Textilbeton zur Erstellung des erfindungsgemäßen Baukörpers (10) gestattet die Ausführung mit besonders dünner Wandstärke sowie auch die Ausbildung relativ filigraner Verstärkungsstrukturen zur Aussteifung.
