Abstract (en)  
[origin: WO2011094774A1] The invention relates to a drawer structure (5) comprising a fixing device (6) for fixing a front panel (7) to a drawer container (8) in a detachable and position-adjustable manner. The front panel (7) can be detachably connected to the fixing device (6) by means of a connection element (9) pre-mounted on the front panel (7). A first adjusting element (1) is associated with the container (8), for adjusting the position of the front panel (7) in the vertical direction (HR), and a second adjusting element (2) is associated with the container (8), for adjusting the position of the front panel (7) in the lateral direction (SR), at least the first (1) and second (2) adjusting elements engaging with the same part of the connection element (9).
