Abstract (en)
[origin: WO2011094780A1] The invention relates to a pull-out guide (3) for a drawer (2), wherein the pull-out guide has a body rail (3c) to be fastened to the furniture body (4) and at least one pull-out rail (3a) that can be moved relative to the body rail (3c), the pull-out guide comprising a retaining element (5) having a connecting element (7), by means of which the drawer (2) can be adjustably connected to the pull-out rail (3a), wherein the retaining element (5) is or can be connected to the pull-out rail (3a) and wherein the connecting element (7) is movably mounted relative to the retaining element (5), wherein an adjusting device for horizontally moving the connecting element (7) is arranged on the retaining element (5), wherein the adjusting device comprises a converting device (9, 18, 32), which can be rotationally moved about an axis arranged substantially parallel to the longitudinal axis of the pull-out rail (3a) and by means of which a rotational motion component can be converted into a translational motion of the connecting element (7).
