Abstract (en)

[origin: WO2011094781A1] The invention relates to an adjustable tilting device (10) for containers (21), in particular for drawers (22), comprising a first contact point (1), by means of which the tilting device (10) tilts the container (21), and a second contact point (2), the height of which can be adjusted by first adjusting elements (12, 12', 12'') of the tilting device (10), wherein the tilting device (10) has at least one further, third contact point (3), the height of which can be adjusted by further, second adjusting elements (13, 13') of the tilting device (10).
