Abstract (en)
[origin: WO2011095612A1] The invention relates to a toilet seat characterized in that said seat comprises: a metal tube (3) bent into a U-shape and having a flattened cross-section, two plugs (8) each closing one end (6) of said metal tube (3) and each comprising an opening, said openings being substantially aligned in a transverse direction, a tilting pin (9) received inside said transverse openings of the plugs (8) and attached in said transverse direction. The invention also relates to a method for producing such a toilet seat.
