Abstract (en)
[origin: WO2011096796A1] The invention relates to a game device comprising a block (3) and a bar (2), wherein the block has a receiving space (30) which is accessible to the bar and in which the bar can be rotated and displaced so that it is accommodated in a fitted manner. The block and the bar are provided with a system which guides the block across the bar. This system, on the one hand, comprises a radial protrusion (20) and, on the other hand, a labyrinth - like guide formed by slots and walls for the protrusion. The guiding system furthermore comprises a one-way slot (60) which does not form part of the labyrinth-like guide.
