Abstract (en)  
[origin: WO2011095699A1] The invention relates to a method for manufacturing a composite piece, a model, and a method for manufacturing and using the model. The model (3) is of natural stone from which material is removed to form a shaped surface (2), material (6, 12, 24, 26, 27) being arranged against the surface to take a shape corresponding to the profile of the shaped surface. The material of the model may be soapstone. The model may be a lamination model, against the shaped surface of which composite material (6) is laminated.
