Abstract (en)

[origin: WO2011095701A1] The invention relates to a device serving as a lateral headrest for a vehicle comprising a headrest body (23) mounted on an inner sidewall (9) of the vehicle so as to move between a stowed position (E) and a deployed position (D) offset along the wall. According to the invention, the headrest body (23) can pivot about an axis orthogonal (AA') to the inner wall such that one of the edges thereof travels in a circular arc on the vehicle wall. The invention is used in particular in the field of vehicle headrests.
