Abstract (en)

[origin: WO2011096004A1] A process is described which allows recycled material, such as worn pneumatic tyres to be used to partially or totally replace polyethylene (PE), polypropylene (PP), ethylvinylacetate (EVA), styrene-butadiene copolymer (SBS), in the manufacture of bituminous conglomerates and/or asphalts for paving roads. Moreover, bituminous conglomerates and/or asphalts for paving roads which can be obtained through the process at issue are also described.
