Abstract (en)

[origin: WO2011095276A1] The invention relates to a closable fire protection opening (1) for drywall construction, comprising a panel (2) having an opening (3), a cover (4) for covering the opening (3), wherein the panel (2) has an opening edge (5) defining the opening (3) and the cover (4) has a cover edge (6), and a fire protection cover (7), wherein an interlocking connection is formed between the opening edge (5) and the cover edge (6) in such a manner that in the assembled state the cover (4) is retained in the opening (3) and the fire protection cover (7) rests on a frame (8) associated with the panel (2).
