Abstract (en)

[origin: WO2011095723A1] The invention relates to a control for opening the hood of a motor vehicle, said control including a control member (1) that is movably mounted on a mounting (3) comprising a means for attaching said mounting to part of the bodywork of the vehicle. Said control is characterized in that said mounting (3) includes a chute (5) for retaining at least one wiring harness and for said at least one wiring harness to pass through.
