Abstract (en)

[origin: WO2011094797A1] A door panel for use with an open sided container (21) comprising a plastic door panel (11) and a plurality of inserts (26) located within the panels that enable attachment of fittings such as hinges (13) and latches (14) to the panel (11). The panels (11) can be used in pairs to form bi-fold doors. The door panels (11) provide secure closure for the open sided containers with advantage of significant weight saving.
