Abstract (en)
[origin: WO2011092115A2] A bottle storage element for a refrigeration appliance, especially a domestic refrigeration appliance, comprises a first plate (7) the top of which has a deepened portion (9) for accommodating a lying bottle (3), and at least one second plate (8). The first plate (7) has a recess for the at least one second plate (8; 28, 29). The plates (7, 8) can be displaced relative each other between a withdrawn position, in which a deepened portion (12) of the second plate (8) is substantially hidden under the first plate (7), and at least one off-set position, in which the deepened portion (12) of the second plate (8) is at least substantially exposed.
