Abstract (en)

[origin: EP2532447A1] The apparatus has conveying device (2) that conveys plastic material container (10) along preset conveying path. Several spraying devices (4) act upon inner space of container with gaseous medium and are movable within the container. The gaseous medium reservoir is connected to the spraying devices through a connecting line. An ionizing unit (20) is arranged between reservoir and spraying devices to ionize centrally gaseous medium arriving at spraying devices. An independent claim is included for method for rinsing plastic material container.
