Abstract (en)

[origin: EP2532598A1] The cradle (1) has two longitudinal panels (3, 5) that are connected together by a bottom panel (7). A damper support (31, 51) is cut in one of the longitudinal panels with a set of transverse hinges (31a, 51a). The damper support is movable between a retracted position in the panels and a folded position against the panels so as to form a surface support for a cardboard bottle e.g. Bordeaux bottle, provided between the two longitudinal panels. One of the longitudinal panels is prolonged by a set of locking flaps (33, 53). Independent claims are also included for the following: (1) a postal packing (2) a method for packaging a bottle in a package.
