Abstract (en)

[origin: EP2532816A1] The device (10) has a drive housing (12) with housing parts (12a, 12b), which are connected with each other. The housing parts are provided with connecting rod guides (14a, 14b) i.e. guide projections. Openings (30a, 30b) are formed at the housing parts and aligned with other openings (34a, 34b) of the housing parts in a connected condition of the housing parts. Connecting elements (26a, 26b) e.g. pins, are partially guided into the openings for fixing connection of the housing parts in a connected condition of the drive housing. The housing parts are identically designed and made of plastic.
