Abstract (en)

[origin: EP2532848A2] The device (1) has a carrier (3) for mounting the device on a housing (6), particularly a crankcase of the internal combustion engine (2). An oil cooler (4) and an oil filter (5) are arranged at the carrier. A permanently open bypass channel is formed in the carrier and bypass the oil cooler. A throttle element is arranged in the bypass channel and throttles the bypass channel. The bypass channel passes into a connecting channel.
