Abstract (en)

[origin: EP2532974A1] Door adapted to close a cooking chamber comprised in a cooking body of a cooking device for low pressure cooking, which comprises an exterior panel (95), an interior panel (96), and at least one support (91) attached to the exterior panel (95) in which at least partially the interior panel (96) is housed. The door (75) comprises compensation means (100) coupled to the exterior panel (95), upon which rests the interior panel (96), the compensation means (100) being adapted to move the interior panel (96) in relation to the support (91) and to ensure contact between the interior panel (96) along a closed contour, against a sealing gasket attached to the cooking body.
