Abstract (en)

[origin: EP2533509A1] A method and communication device for scheduling a conference call. The method includes receiving, in a first communication device, an invitation message containing at least some conference call scheduling information with respect to a scheduled conference call session; displaying an interface in relation to the invitation message, the interface including an option to send a request for recorded conference call content of the scheduled conference call session; receiving an input selecting the option; and sending a communication to a second communication device including a response to the invitation message and including said request for recorded conference call content. A conference call server is also described for sending recorded conference call content to the communication device.
