Abstract (en)

[origin: WO2011099859A1] The invention relates to a system for releasably attaching an article of clothing to a body, comprising a first fixing element (2 - 1, 3 - 1) intended for attachment to the article of clothing and a second fixing element (2 - 2, 3 - 2) intended for adhering to the body, wherein both fixing elements are provided with co-acting connecting means. The system according to the invention has the features that at least the second fixing element is manufactured from substantially stiff material, the second fixing element is provided with a substantially flat adhering surface, the co-acting connecting means are arranged substantially centrally on the first and second fixing elements, and the connecting means form a sliding connection.
