Abstract (en)

[origin: WO2011098172A1] The invention relates to a hand-held power tool (1) having a drive unit in a housing (2) that is to be switched on and off by means of a switch device, which comprises a switch (10), which is accommodated inside the housing (2). Elastomer elements (9, 14) are molded onto the outside of the housing and onto the inside of the housing and are connected to each other via an opening in the housing wall, wherein the elastomer element (14) on the inside of the housing forms an elastomer bearing for supporting the switch (10).
