Abstract (en)

[origin: CA2789374A1] The invention relates to a crash module for a rail vehicle, comprising at least one crash element (2, 2a), which is arranged in front of the vehicle structure (1), wherein at least one transverse profiled element (3, 4) is provided, which is connected to the at least one crash element (2, 2a) and which has a substantially lower compressive strength in the longitudinal direction of the rail vehicle than in the transverse direction.
