Abstract (en)  
[origin: WO2011097746A1] The invention relates to a spinning machine comprising a drawing frame having a drawing frame unit (35, 65, 95) provided with a first pair of rollers consisting of a first lower roller (22, 42, 72) and a first upper roller (21, 41, 71). The drawing frame unit (35, 65, 95) is embodied as a structural component that is detachably fixed to the spinning machine by means of a fixing device (11, 59). The drawing frame unit (35, 65, 95) is preferably designed for one spinning station or as a twin drawing unit for two adjacent spinning stations. The unit can comprise other rollers that, together with the first pair of rollers, form a drawing zone of the drawing frame.
