Abstract (en)
[origin: WO2011098397A1] The invention relates to a drying arrangement (20) for drying a fibrous web (10), especially a paper, tissue paper or cardboard web, comprising at least one short drying group (14, 15) and at least one long drying group (1). The drying arrangement (20) according to the invention is characterised in that the at least one long dry group (1) is arranged upstream and/or downstream of at least one short drying group (14, 15), and the at least one long drying group (1) comprises at least 7 drying cylinders (2) and the at least one short drying group (1) comprises a maximum of 5 drying cylinders.
