Abstract (en)

[origin: CN102824060A] The invention relates to a high chair with a shoulder girdle fastening device, which comprises a chair device and a shoulder girdle fastening device, wherein the chair device is provided with a chair and a shoulder girdle unit; the shoulder girdle fastening device is provided with a body and a press fastener; the body is fixed on the chair; the press fastener is convex on the bottom part of the fastening ring groove of the body and is in a telescopic state correspondingly to the fastening ring groove; thus, only the press fastener is pressed, a fastening ring can easily slide in or out the fastening ring groove transversely; the fastening ring is fastened or taken out beneficially and very conveniently; the shoulder girdle fastening device is provided with a popping knob; the popping knob is arranged in the body and can slide; after the press fastener is pressed, the popping knob is popped automatically so as to push out the fastening ring transversely; thus, the top face of the press knob is pressed by the fastening ring automatically so as not to pop the press fastener back. According to the invention, the high chair has a function of easily fastening and popping the fastening ring automatically and also has very good convenience.
